

”RESPONSIBLE CARE”

- NMC develops and distributes products that cause minimal pollution of the environment during manufacturing, use and disposal.
- NMC pursues environmental protection on its own initiative and responsibility, and implements all preventive measures.
- Legal specifications and official requirements are complied with as minimum standards.
- In addition, NMC uses environmentally friendly technologies in cooperation with authorities, research institutes and Universities.
- Avoiding, reducing or re-using waste is a priority in comparison to landfill or incineration. Economical use is made of scarce resources, such as energy and water.
- NMC takes preventive measures on its own initiative to protect the air, the soil and the water and to avoid possible accidents.
- NMC pursues an open information policy in relation to employees, neighbours, customers, authorities and suppliers.

”Responsible Care” is a well established, international set of rules within the plastic industry, which from an environmental point of view, guides the activities of the companies that sign a commitment to follow the rules.
