Wainscoting

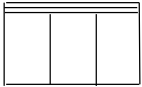

Introducing
a new category

May 2025

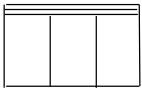

WAINSCOTING

Positioned **side by side** and finished with an elegant decorative moulding, these wall panels create a sophisticated and cohesive look

For each end, a dedicated left or right end panel is provided, which is then crowned with a decorative finishing molding.

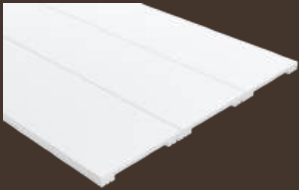

Together, they create a **sophisticated wall frame** that can span either part of the wall's height or its full height, depending on the desired interior effect.

THE BENEFITS OF WAINSCOTING

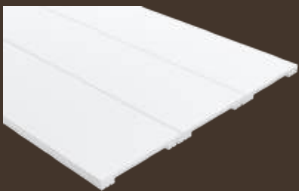

M A R D O M
D E C O R

It adds elegance and a timeless sense of style to any interior.

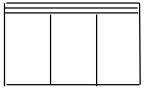

Protects walls from damage and marks — an ideal solution for hallways, hotels, and restaurants.

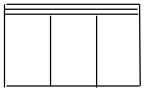

Establishes a warm, sophisticated ambiance — effortlessly enhancing interiors from classic to modern.

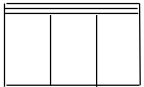

WHAT INSPIRED THE DEVELOPMENT OF THIS CATEGORY?

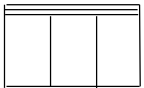

Growing trend for ornamental walls:
increasing interest in decorative solutions such as wall panels, lambris anglais, wainscoting, and boiserie.

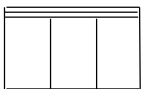

Portfolio expansion.

Highly versatile product.

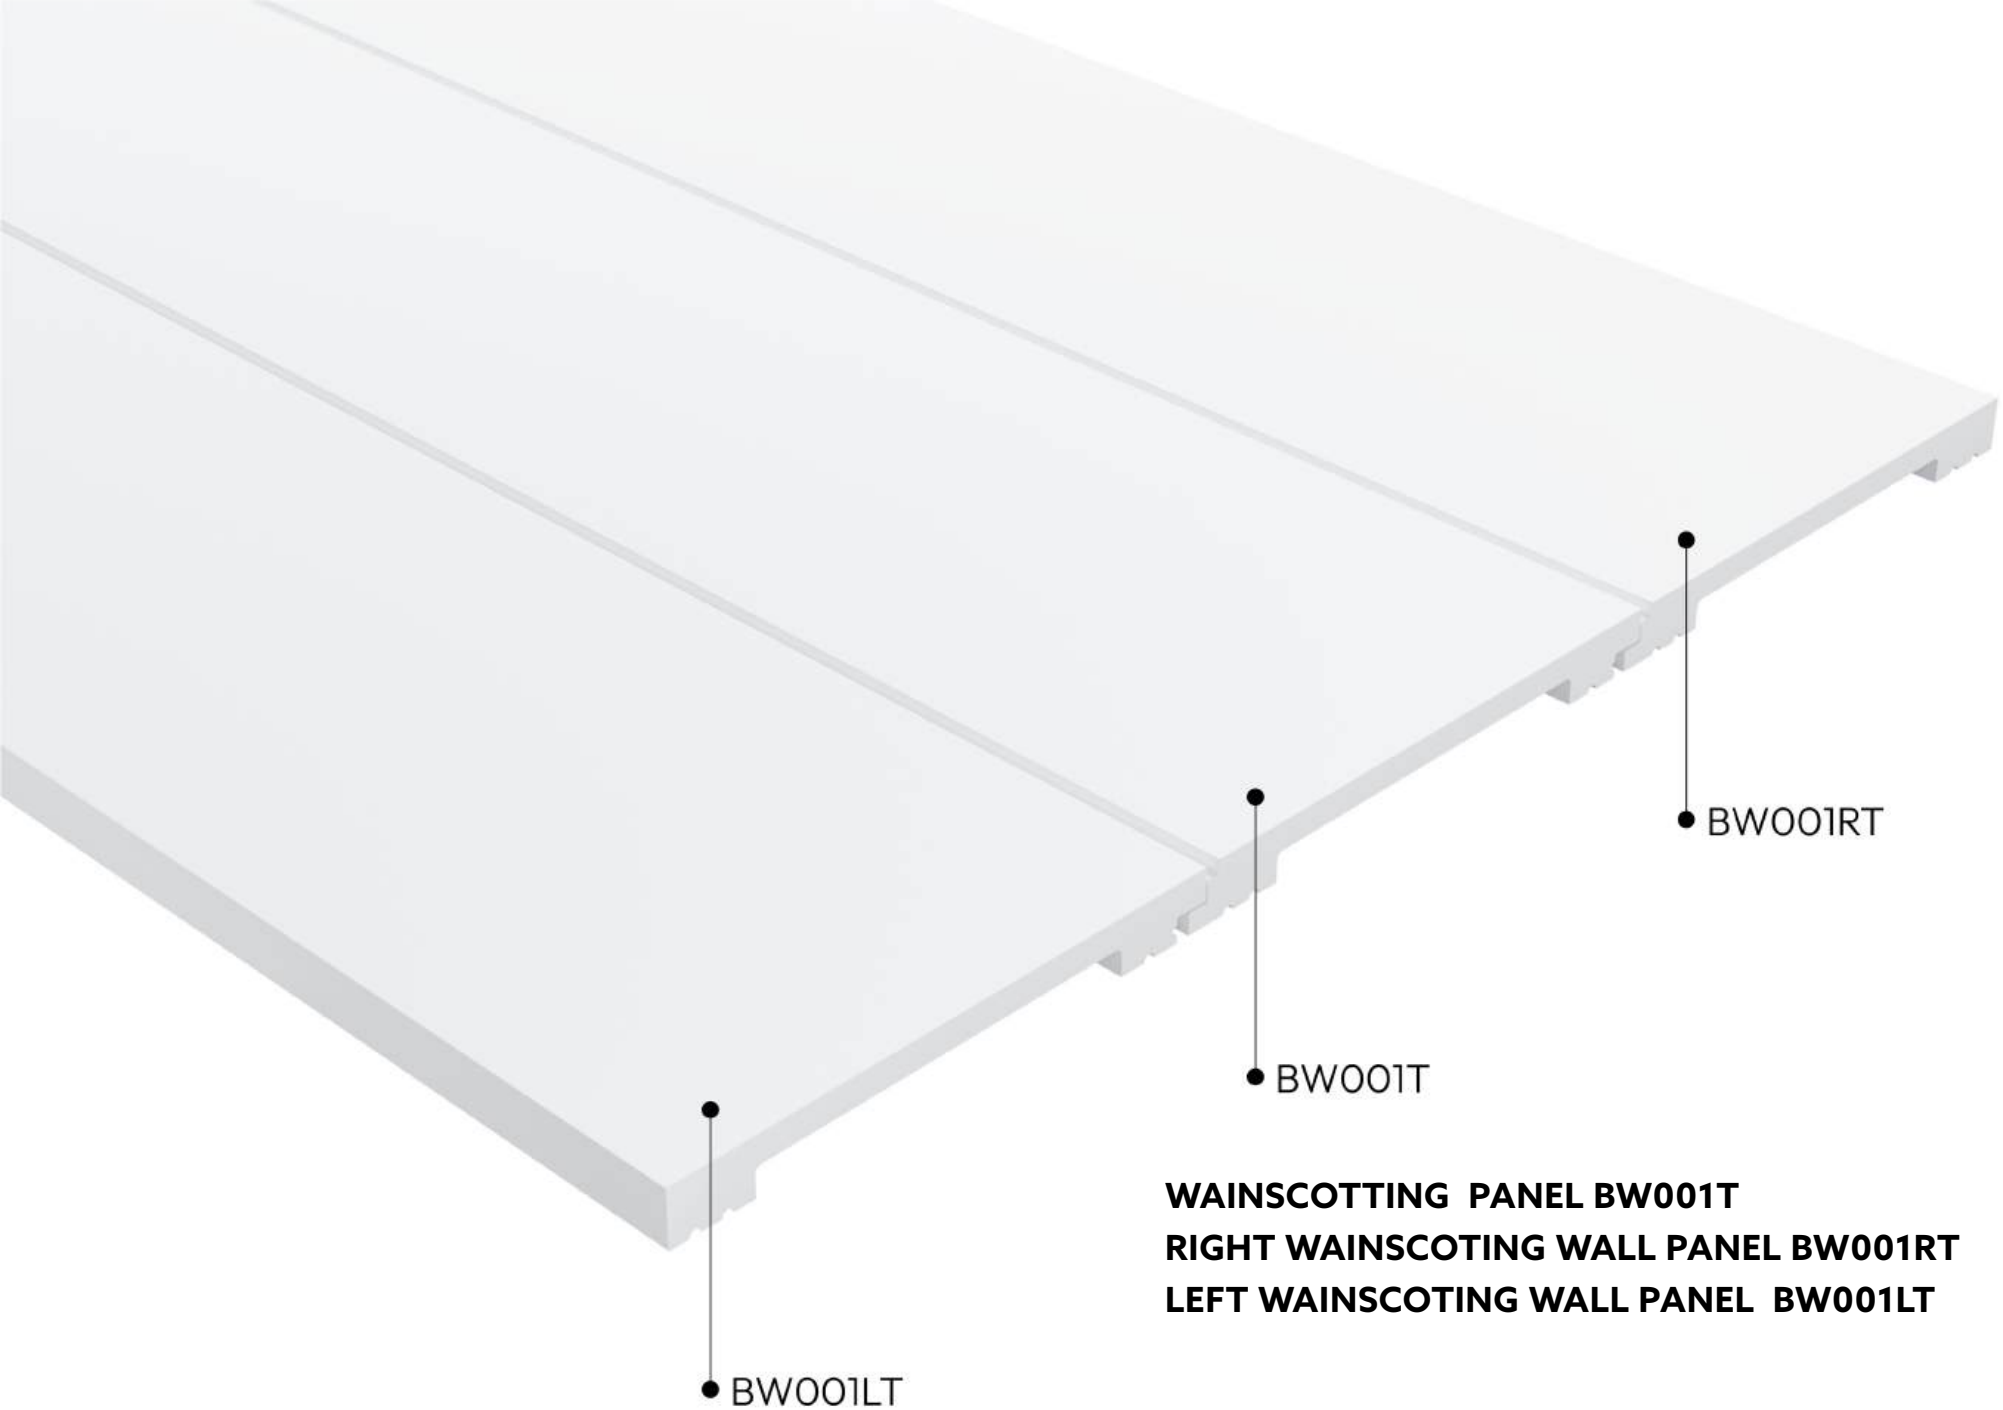

Potential for collection development:
Finishing moldings compatible with other product lines (Stretto, Medio, Sereno, Duna, Lumio), creating additional cross-selling opportunities.

A strategic response to market demand of B2B and B2C clients – including developers, architects, and private investors.

WHITE WAINSCOTING

The panels can be customised to suit your interior by painting them in any colour of your choice

For best results, we recommend using water-based, solvent-free paints

The fastest and most consistent results can be attained through spray painting.

2 WAINSCOTING FINISHES

MATT - designed for painting.

PREMIUM - finished with an elegant satin white lacquer.
Products designed for immediate installation, with no need for additional painting.

LENGTH 200 cm

200 cm is a standard height.

It is adequate as:

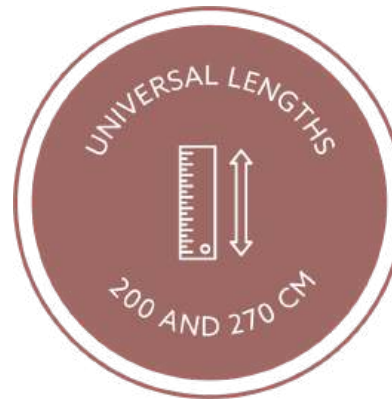

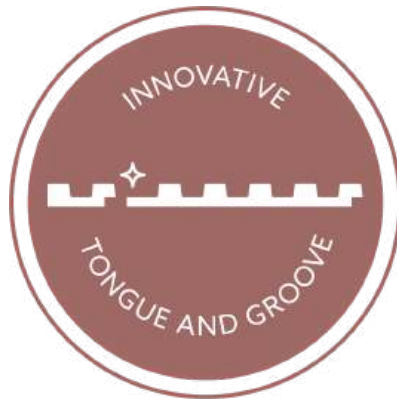

- wall adornment in living rooms, bedrooms, hallways,
- television displays or furniture laminates,
- bed headboards,
- ornamental structures in commercial environments.

The T designation provides the opportunity to introduce an additional size in the future, although not in the immediate term.

- INSTALLATION INSTRUCTIONS

M A R D O M
D E C O R

To adjust the width of the panelling board to the required dimensions at the installation site.

1. **Prepare the tools:**
 - a utility knife with a replaceable blade,
 - a spirit level or a straight profile (e.g. aluminium).
2. **Mark the cutting line:** place the spirit level or straight profile at the planned cutting point on the panel surface.
3. **Make cuts:** guide the knife along the spirit level, cutting the panel several times in the same place. The more cuts you make, the smoother and more aesthetic the edge will be after breaking.
4. **Break the panel:** gently break the panel along the cut line.
5. **Smooth the edge:** sand down any unevenness with 100–120 grit sandpaper.

WAINSCOTTING - INSTALLATION INSTRUCTIONS

MARDOM
DECOR

Installing the panel after cutting:

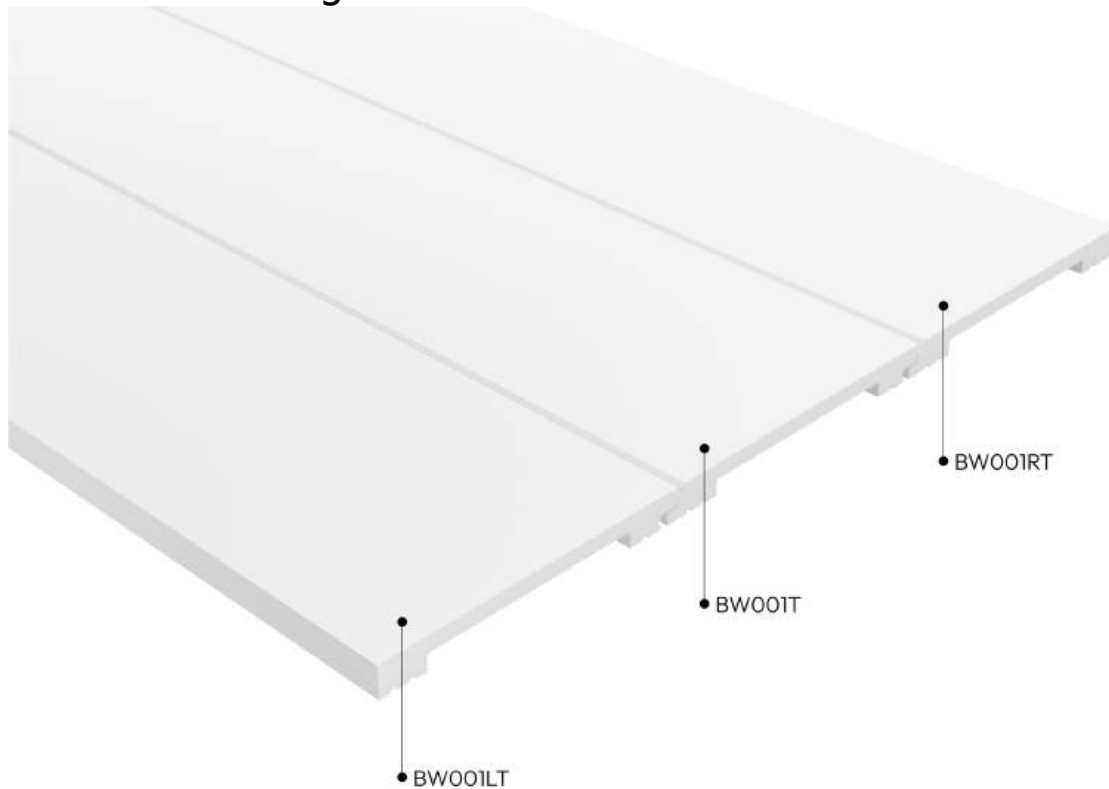

1. **Apply mounting adhesive to the surface of the panel and to the gap between the wall and the cut profile.**
2. **Place the panel against the wall, keeping the line continuous with the previously installed panels.**
3. **Press down and align the profile using a spirit level or a guide profile to mark the installation line.**

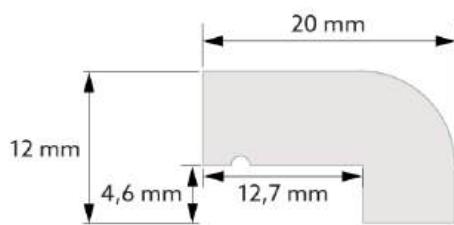

WAINSCOTING TERMINATION

This represents the left and right end components.

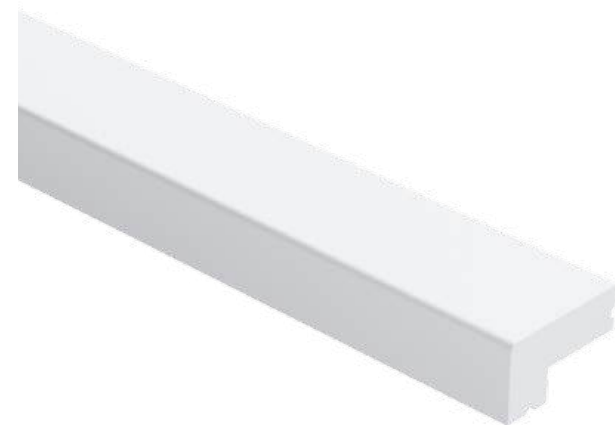

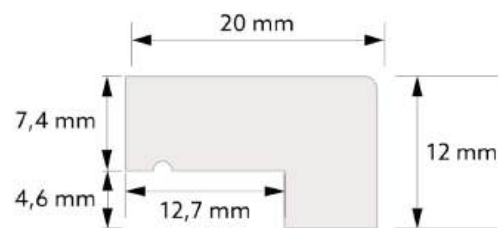

The left and right panels provide an aesthetically pleasing finish for the panel walls on both edges.

PRODUCT COMBINATIONS AS A BASEBOARD ALTERNATIVE

Capability to create elevated skirting boards up to 14 cm in height.

Flexibility in combinations without the need to order bespoke or non-standard components.

Neat and durable finishing of corners and edges — effectively sealing the strip at doorways or wall junctions, enhancing both appearance and longevity.

Easy replacement of decorative profiles for maintenance or design updates.

Enables the construction of classic wainscoting or elevated skirting boards.
